

Interactive comment on “HadISDH: an updated land surface specific humidity product for climate monitoring” by K. M. Willett et al.

K. M. Willett et al.

kate.willett@metoffice.gov.uk

Received and published: 27 February 2013

We have now responded to all reviewer comments and made a number of amendments to the paper in response. These are documented fully in the attached pdf. This includes some small changes to the values presented in our first submission because of updating the data to include 2012 and correction for an error in the SLP algorithm used in calculating specific humidity. None of the main conclusions are changed however. We thank the reviewers and editor for their very helpful comments and believe that this is now an improved piece of work. We hope that reviewers will be happy with our revisions.

Please also note the supplement to this comment:

C3489
