

Interactive comment on “Differences between the glacial cycles of Antarctic temperature and greenhouse gases” by A. W. Omta

A. W. Omta

omta@mit.edu

Received and published: 28 June 2012

Referee #3 has given a short point-to-point reply to my brief response to Referee #1. For clarity, I have created the attached document (see Supplement) in which my original response to Referee #1 is indicated in blue and my response to Referee #3 in blue and italic, while the comments of Referee #3 are indicated in dark red.

Please also note the supplement to this comment:
