

Interactive comment on “A model-data comparison of the Holocene global sea surface temperature evolution” by G. Lohmann et al.

G. Lohmann

gerrit.lohmann@awi.de

Received and published: 29 June 2012

The manuscript deals with a data-model comparison of Holocene sea surface temperature trends. The trends and related mechanisms are evaluated and discussed. I guess the 2 lines are not related to a scientific comment on the manuscript.
