Received and published: 3 June 2013

All three referees who read your manuscript agree about the good quality of this paper. They pointed out the interest and importance of the data. This work was expected since a few years already and it is really worth publishing.

The referees provide comments and suggestions. I invite you to answer carefully and in detail the comments and take into account the comments and suggestions when preparing a revised version of the manuscript. In particular, I strongly invite you to pay a particular attention to all the figures and their legends as well as to the abstract.
