

Interactive comment on “Mass movement deposits in the 3.6 Ma sediment record of Lake El’gygytyn, Far East Russian Arctic: classification, distribution and preliminary interpretation” by M. A. Sauerbrey et al.

M. A. Sauerbrey et al.

maaret.kukkonen@uni-koeln.de

Received and published: 3 July 2013

We have considered all of the comments by the three referees and have incorporated the majority of them to the revised version of the manuscript. We would like to thank all three referees for the constructive comments and suggestions that have greatly improved the quality of the manuscript. The changes we have made in the revised MS are highlighted with yellow color. Answers to the specific reviewer comments (see text in italics) can be found in the attached supplement.

C1350

Sincerely, Maaret Sauerbrey
