Dear Dr Papina, I have read with great interest the MS on biological proxies recorded in a Belukha ice core, Russian Altai and I would strongly invite you to submit a revised version taking into account the detailed comments of the referees.

I found the paper sometime difficult to follow and especially the method description quite misleading.

I hope you'll find some time to carefully review this MS, which per se potentially very interesting for the IPICS Special Issue.

BEst Wishes, Carlo Barbante
