Interactive comment on "Forward modelling of tree-ring width and comparison with a global network of tree-ring chronologies" *by* P. Breitenmoser et al.

J. Guiot (Editor)

guiot@cerege.fr

Received and published: 15 September 2013

Dear authors

The discussion time of your paper is now closed. Both reviews are positive but they request some additional work to make your paper more valuable. You have now to reply to the comments of both reviewers and to propose a new version which will be considered for publication in Climate of the Past. I understand that the comments are not always easy to be taken into account, but whatever is your position, you have to explain clearly what you will change to the paper or the arguments you have in refuting some of them. An important point raised by both reviewers is to clarify the structure of

the paper.

With my best regards

Joel Guiot
