Received and published: 6 December 2013

Dear R. Saraswat (Editor),

Thank you very much for the report. We have replied to reviewers' comments point by point.

For detail:

1. We have added the climatology of JJA precipitation and Surface wind of the control run.
2. We have made the points mentioned clearly.
3. We have added additional references.

C2820

4. For the another set of experiments to study the effect of air-sea interaction (Change in SST), it would be great idea to investigate in our next study. Because this topic is not the main point of this manuscript, we do not include this topic. We give thanks to the reviewer for the great idea.

Bests
