Received and published: 19 February 2014

We have received two reviews, covering the two aspects of the work. Both reviewers find this a valuable study that should be published eventually. I am therefore happy to encourage you to prepare a new version for CP. However, you will need to respond to each of the reviewers' comments, both in your author response and in making amendments to the paper. There are some reasonably weighty points made that have to be addressed.
