Dear authors,

first of all, I would like to apologize for the delay in the revised procedure, due to a "work-overcharge" in the last month.

Your paper has been seen by two reviewers who performed a thorough analysis of

your paper. Several colleagues also comment on it. The key points raised during the review/comment process are linked to stratigraphy, model-data agreement, quality of the data, and interpretation regarding the development of low oxygen conditions. You did a nice job in your review, but given the amount of questions raised, I think that another round of reviews is required, with the two original reviewers and one additional reviewer.

Best regards.
