Received and published: 21 April 2013

Dear Tom Russon and co-authors,

The Climate of the Past Discussion phase of your manuscript “Inter-annual tropical Pacific climate variability in an isotope-enabled CGCM: implications for interpreting coral stable oxygen isotope records of ENSO” has now ended and your manuscript has received comments from three reviewers. The reviewer comments are very positive and have recommended publication of your manuscript with minor revisions. The reviewers

C453

all provide clear and helpful suggestions that will provide guidance on areas where the manuscript can be strengthened.

To continue with the review process, you now need to revise your manuscript based on the reviewer’s comments. You also need to prepare a response to each of the reviewer comments, including highlighting the changes made to the manuscript. These responses should be posted as an author comment on your paper’s discussion page.

Please let me know if you have any questions, and thank you for submitting your work to Climate of the Past.

Sincerely, Nerilie Abram
