Received and published: 14 May 2013

Dear Prof. Berger,

Two external reviewers posted their comments. Though both find your contribution interesting and stimulating, they are asking for major revisions. Referee 1 is asking for more detailed information on the statistical treatment of the data and more detailed figure captions. The second referee has major concerns and questions some of your interpretations. I invite you to address their comments and to prepare a revised version of your manuscript.

With best regards, Dominik Fleitmann
