Received and published: 26 April 2016

Dear authors, we have now received two evaluations of your paper. The first reviewer consider that your paper has a good scientific level, but its needs to be more rigorous in the vegetation nomenclature and should be based on more solid reference literature on the Mediterranean vegetation. The second reviewer has appreciated the paper but wish a better consideration of the limits of the dating on bulk samples. Another point is that the Roman period is not usually considered as warm. We expect now that you reply to the reviewers in a cover letter accompanied by the ms revised in track change mode (as annex of the cover letter). Best regards Joel Guiot
