Now we have included figures 2 and 3.

Figure 2: QPF 1 km grid spacing 12UTC 24-09-1915 – 00UTC 26-09-1915 for the ensemble members 1, 13, 22 and 37: first row results corresponding to simulations driven by outermost domain at 25 km grid spacing, second row the same but with outermost domain at 125 km grid spacing.

Figure 3: Member 1, 06UTC on 25 september 1915. Panel A shows the 2 m potential temperature field together with the 10 m horizontal wind vector field. Panel B to G show
