We are thankful for the reviewer's insights on the changing nature of data availability. We agree that true science is based on "data and conclusions [that] can be independently verified" and that, in science generally, "the norm is that most research data...should be [made accessible]." We are glad that the reviewer thinks that our Technical Note "will become a reference paper for those...actually working on trying to solve this issue as it clearly and succinctly documents the key issues." And we will correct the typo pointed out by the reviewer.
