

Second Response File – Climate of the Past Manuscript cp-2017-37

We thank the copyediting staff for their thorough treatment of our manuscript. All of the author queries have been addressed in the annotated document. We have also added additional references to make the manuscript as comprehensive and up to date as possible. All of the additions are merely to include the most accurate assessment of the literature; nothing about the general statements or conclusions of the manuscript are changed by these additions.
