

Interactive comment on “Climate of migration? How climate triggered migration from Southwest Germany into North America during the 19th century” by Rüdiger Glaser et al.

Anonymous Referee #1

Received and published: 28 July 2017

I think the paper addresses relevant scientific topics, which are within the scope of the journal.

Furthermore, it focuses on an emigration period and a region which needs to be analysed even more. The paper uses quantitative and qualitative methods of empirical social research which is a strength of it. Taking all the comments (attached in the pdf document) into account I would "accept it with minor revision".

Please also note the supplement to this comment:
