Received and published: 9 January 2019

Dear authors,

thanks for submitting your contribution to climate of the past. I again apologize for the delay in the revision process, due to the failure of the second reviewer.

Based on the review and on my own reading of the manuscript, I think that your contribution deserves publication in Clim Past. Both reviews asked for limited changes, and for more discussions about the limitations of the method. This can be achieved easily I think. Both reviews asked for minor revisions.

I encourage you to submit a revised version asap.
