

Review of the 1<sup>st</sup> revision of “Enhanced Mediterranean water cycle explains increased humidity during MIS 3 in North Africa”

Based on the revised ms, and the answers by Rogerson et al to my comments and questions on the initial submission, I conclude that I can now support final publication of this ms in COTP.

Please check lines 155, 324-325, 373-374, 413-414, where I believe I spotted some typos/grammar inconsistencies.
