

[Authors Response, final submission of cp-2018-157](#)

We submit the final file uploads. We include a clean pdf document of the whole manuscript and the MS Word .docx version. We also include pdf versions of all figures that were produced using Adobe Illustrator. There were no text revisions from the editor to fix.

We have added *Code/Data Availability, Author Contributions, and Competing interests* to the text, and have copied the excel files into MS Word tables in the text rather than using a screen grab. If you would like the original excel files, please let us know. We have checked the figures to make certain that the fonts were embedded.
