

Interactive comment on “Rapid increase in simulated North Atlantic dust deposition due to fast change of northwest African landscape during the Holocene” by Sabine Egerer et al.

D.-D. Rousseau (Editor)

denis-didier.rousseau@lmd.ens.fr

Received and published: 7 May 2018

Dear authors,

Both reviewers have released their comments and reviews. As the discussion phase is still opened, I would encourage you to post early comments about these two reviews so that one could use the opportunity that the discussion phase allows the author to exchange with the reviewers before the final decision. All the very best,

denis-didier Rousseau, Clim Past co-editor in chief
