Interactive comment on "Climate impacts on deglaciation and vegetation dynamics since the Last Glacial Maximum at Moossee (Switzerland)" *by* Fabian Rey et al.

Anonymous Referee #1

An excellent manuscript presenting detailed high-resolution pollen data in a critical and thorough way. I have some minor revisions to suggest.

Line 31: I prefer not splitting infinitives, so suggest 'to modify irreversibly'.

Line 74: Change "with predominantly sandstones between" to 'with predominantly sandstone in between'. Change "north" to 'north' and "South" to 'south'

Line 76: Change "West" to 'west' and "East" to 'east'

Line 90: Hyphenate "lake shore villages" ('lake-shore villages')

Line 94: 'centre' rather than "center"

Line 96: Change "in town" to 'in the town'

Line 97: 'centre' rather than "center"

Line 103: Change "an UWITEC" to 'a UWITEC'

Line 127: Change "assess" to 'estimate'

Line 146: Change "data was" to 'data were'

Line 150: Also Birks et al. (2015) Rev Pal Pal for a review.

Lines 154-159: I have reservations about PRI/PIE and using the residuals + PRI. See Birks et al. (2016).

Line 165: Personally, I would have used DCCA with depth as the constraining variable (Birks 2007, VHA) as pollen data are time-ordered. DCA does not take account of the depth. It does not make much difference but DCCA is for the purist.

Line 224: Change "releasing" to 'leading to'

Line 228: Change "released" to 'resulted in'

Line 241: Change "reestablishment" to 're-establishment'

Line 273: Change "land use phases" to 'land-use phases'

Line 284: Change "favoring" to 'favouring'

Line 286: Change "land use phases" to 'land-use phases'

Line 332: Prefer 'to form quickly' rather than "to quickly form"

Line 333: Add a comma after "First" ('First, arboreal . . .)

Line 349: Delete "first"

Line 350: Change "dwarf birch thickets" to 'dwarf-birch thickets'

Line 357: Change "North" to 'north'

Line 359: Change "wide-spread" to 'widespread'

Line 370: Add 'and' before "Rangifer"

Line 376: Change "Betula pendula" to 'B. pendula'

Line 378: Add 'the' before "tree"

Line 416: Change "favored" to 'favoured'

Line 429: Change "land use history" to 'land-use history'

Line 431: Add 'the' before "first"

Line 432: Change "falls" to 'fall'

Line 438: Change "land use" to 'land-use'

Line 443: Change "land use phases" to 'land-use phases'

Line 445: Change "land use phases" to 'land-use phases'

Line 453: Change "favorable" to 'favourable'

Line 459: Add 'the' before "driving"

Line 466: Change "reestablish" to 're-establish'

Line 469: Change "drought resistant" to 'drought-resistant'

Line 480: Do you have Betula humilis?

Line 515: Change "identification" to 'identifications'

Line 910: Change "Neolithic" to 'Neolithic'
