Dear Prof. Tinner, thank you for your encouraging review which contains many useful suggestions and comments. We are preparing a point to point reply addressing all the issues and at the same time revisiting graphics related to pollen data. In general we are rethinking the role of human induced factors in our analysis, reevaluating some interpretation of pollen changes.

We will post it as soon as possible. Best Regards,

Stefano Segadelli, Federico Grazzini, Veronica Rossi, Marco Marchesini and Silvia
