We would like to thank Reviewer 1 for their speedy and supportive comments on our manuscript.

I would like to clarify that the standard deviations presented in figures 1,2 & 6 are intended to demonstrate the variation in the signal between the GCMs. They are the ensemble standard deviation in the temporal mean changes at each location - rather than the ensemble means of the temporal standard deviations.

We would correct the spelling and captioning errors in a revised manuscript. We would consider the proposed changes to the figures.
