Dear Attila Démeny,

thanks for noticing the mistake in the equation used to convert V-PDB values to the V-SMOW scale.

We have now re-done the calculations with the correct equation and can confidently say that the conclusions presented in our manuscript do not change. The revised V-SMOW values are at a constant offset of ~ 1 permil from the ones initially presented and the impact of this correction is only noticeable on the intercept of the regressions

[Discussion paper](#)

presented in Figure 3 and Supplementary Figures 1 and 2. This correction has no noticeable impact on the spatial transects presented in Figures 7 and 8.

We will revise the text and figures with the corrected values.

Best regards,

Laia Comas Bru
