

Interactive comment on “Optimizing sampling strategies in high-resolution paleoclimate records” by Niels de Winter et al.

Alberto Reyes (Editor)

areyes@ualberta.ca

Received and published: 31 January 2021

Dear Dr. de Winter and co-authors, Your manuscript has now been reviewed by two referees, and the public commentary period is closed. By now you have likely received an automatic email requesting that you provide a response to the referee comments.

Note that you do not submit a revised manuscript when uploading your responses. However, you may find it useful to frame these responses around the revisions you anticipate making to the manuscript. Both referees indicated the work will likely be a useful addition to the sclerochronology literature, so I do anticipate inviting you to submit a revised manuscript after reviewing your responses to referee comments.

Sincerely, Alberto Reyes (handling editor)
