4 January 2021

Dear Editor,

Following your suggestions, we are submitting a revised manuscript of *Response of biological productivity to North Atlantic marine front migration during the Holocene*. In the introduction we have now added a new reference (Våge et al., 2013) to help reflect the continued and more recent research on modern oceanography north of Iceland.

Sincerely,

A handwritten signature in black ink, appearing to read 'David J. Harning', written in a cursive style.

David J. Harning
