Dear Lenneke, dear Nerilie,

I have just realised there is a typo in the caption for Figure 2 in our reply to the reviewer comment; the correct caption should read:

"The difference in correlation coefficient between using unweighted and precipitation-weighted 2 m temperature time series for the correlation with the local oxygen isotope composition (i.e. the difference between manuscript figure 3b and 3a)."

I apologise for the confusion this might have caused.

C1

Kind regards, Thomas
