

Interactive comment on “Holocene sea level and environmental change at the southern Cape – an 8.5 kyr multi-proxy paleoclimate record from lake Voëlvlei, South Africa” by Paul Strobel et al.

Paul Strobel et al.

paul.strobel@uni-jena.de

Received and published: 5 March 2021

As a direct response to the specific authorship issue, the author team would like to emphasise that the conducted research and submitted manuscript followed the German Research Foundation (DFG) Code of Conduct Guidelines for Safeguarding Good Research Practice and especially the publication ethics of CP. We absolutely acknowledge the serious topic raised by Anonymous Referee #2. In this context, we would like to emphasise that the author team has ongoing project collaborations and long-term collaborations with African partners, which is reflected in a longstanding and strong networking record of jointly published papers and conference presentations.
