

Nagatsuka et al, “Variations in mineralogy of dust in an ice core obtained from northwestern Greenland over the past 100 years”

Response to editor’s comments

Dear Editor, Dr. Elizabeth Thomas:

We appreciate you for taking the time out of your busy schedule to read our paper. Below we provide an answer to your comment.

[Editor comment]

Wording on line 365 – consider “....dust to an ice core sight is dependent on distance from the ice sheet margin....”

[Author comment]

We have revised the manuscript as suggested by editor.
