Received and published: 9 July 2020

We thank the reviewer for (again) reviewing the manuscript. We are gratified to read that he/she writes that “My overall impression is that there is a really interesting idea here.” Given the reviewer’s history with the manuscript, we hope that they will read about the results using the van-der-Pol oscillator in the revised manuscript; it greatly adds to the interesting idea. And of course, we will correct all of the typos identified by the reviewer.
