

Author Response, File upload (CP) Iteration: Correction

Dear Liz Thomas,

I applied the changes discussed in the responses to Referees, and uploaded the corrected files. I carefully checked each figure for any compilation issue. Thank you for your work dedicated to this article.

Note for the person in charge of the layout: Following the recommendations for text files, I moved all figure captions at the end of the file. Some Appendix sections do not include text so it would be easier to read if figures were anchored in the corresponding Appendix section, as in the manuscript pdf.

Sincerely yours,

Aymeric Servettaz
